RE: GDiesel

We have Received over 28,000 gallons of GDiesel in our on-site fuel tank and have noticed an increase in miles per gallon on a unit driven the same way, same route and same miles. Original miles were 5.2 per gallon and now after using GDiesel, it gets about 7 miles per gallon, increasing mpg by approximately 34%.

We haven't noticed an increase in power, but we have noticed no problems with cold-starts.

Respectfully,

Ed Dezarn  
Shop Supervisor
