Peter Gunnerman
Advanced Refining Concepts, LLC
Reno, NV 89519-6431

I wanted to provide you with some of the insights we found in the last 9 months, while running Clear G Diesel Fuel in our bus fleet. We have been running this fuel in 47 buses. Our bus fleet consists of many types of 1990 to 2009 engines such as Cummings, Cat, Mercedes, International, Ford.

- | | |
|----------------------|---|
| <u>#1 Mileage</u> | The bus fleet averages 12% increase in mileage. |
| <u>#2 Cold Start</u> | Engine start and run smoother and the exhaust smoke is greatly reduced. |
| <u>#3 Smell</u> | There is no smell to the diesel while fueling and the exhaust doesn't smell like traditional diesel exhaust. It is much better. |

We at Churchill County School District strive to find, and use cutting edge technology to advance our goals. When considering what fuel to run, there is no consideration. Your fuel is superior.

Churchill County School District is looking forward to a long relationship with Advanced Refining Concepts.

Sincerely,

A handwritten signature in black ink that reads "Ron Turner". The signature is written in a cursive, flowing style.
