Mr. Gunnerman

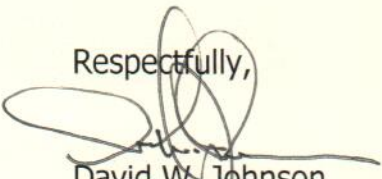

I just wanted to provide you with an update of our experience with GDiesel since we began using this fuel in our real world operations in January 2011. To date we have used over 3 million gallons of GDiesel and we continue to have success with this fuel.

We continue to see improved emissions on the diesel fleet using this fuel as well as the 105 emergency operations generators that operate on this fuel. Further, we are utilizing this fuel in a significant portion of emergency response vehicles, such as Fire Fighting Apparatuses and Ambulances and have not had any failures to date related to this fuel and the visible smoke normally seen from diesel exhaust systems has significant decrease or disappeared entirely.

The fuel mileage has remained constant on the diesel fleet since the implementation of this fuel; some vehicles have seen an increase as high as 6% while some vehicles have seen a slight decrease of less than 1% which is so small that I consider that insignificant.

We will continue to monitor the use of GDiesel whether pro or con as time progresses and will provide you with updates. Our experience to date with GDiesel continues to be nothing short of excellence. It is a pleasure working with you and your company and we look forward to a very long and beneficial partnership with Advanced Refining Concepts LLC.

Respectfully,

A handwritten signature in black ink, appearing to read 'David W. Johnson', with a large, stylized flourish extending to the left.

David W. Johnson
